

## Mission

- Creating awareness on professional qualification and standard system and making the public realize about the benefits of the use of the system
- 2) Encouraging business owners to take part in the development of professional standards and qualifications in line with the national strategy and Thailand 4.0 model
- 3) Promoting the use of professional qualification and standard system for the improvement of capacity development curriculum in educational institutions. Promoting trainings to enhance capacity of employees in the industrial sector and to promote credit transfer system for the advancement of human resources
- 4) Certifying organizations that certify labor capacity in different professions so that they could cover all professions. The procedure should be in line with international standards and should link with Ministry of labor and other relevant organizations.
- 5) Using network center, database, information technology and services related to professional qualifications and standards to support professional qualification system services

## Goals

- 1) There are more people aware of the professional qualification and standard system and its benefits
- Number of professional qualification and standard systems which have been developed based on labor demand and are acceptable in Thailand and abroad
- 3) Professional qualification and standard system has been used and transferred to education sector so that they could use it for the improvement of their curriculum and to industrial sector so they could improve labor capacity and use it as a tool for labor without opportunity to access education under national qualification framework
- Organizations whose duty is to certify labor capacity have been certified. Remuneration rates for different professional qualifications and standards have been studied.
- 5) Network centers, database, IT and services relevant to professional qualifications and standards that support professional qualification system have been established.

## Strategies

To achieve the aforementioned vision, mission and objectives, TPQI Strategy B.E. 2560-2564 should implement the following strategies:

- Strategy 1: Integrating work with other relevant sectors for the promotion and awareness raising about professional qualification and standard system
- Strategy 2: Developing and reviewing professional standards and qualifications in line with the demand of economic sector and international standards
- Strategy 3: Promoting the use of professional qualification and standard system in educational, labor and entrepreneurial organizations so that they could develop their capacity for their staff and for people who do not have access to education system
- Strategy 4: Developing capacity certification system based on professional standards following international standards and encouraging people in all professions to get capacity certifications
- Strategy 5: Using network center, data, IT and services relevant to professional qualifications and standards to support professional qualification and standard system following government policy on e-government
