

The Announcement of Thailand Professional Qualification Institute (Public Organization)

Subject: The Fidelity on Anti-Corruption (TPQI Zero Corruption)

The fidelity on anti-corruption has been assigned to the important strategy of government agencies to follow the national anti-corruption strategy phase 3 (2017-2021). It aims to enhance the ultimate process of governance for the virtue and transparency and to be "Proactive Corruption Prevention Measures" that all government agencies must process.

Thailand Professional Qualification Institute (Public Organization) has realized this issue and the effects of corruption. The executives and officers are concentrated to develop the organization for the transparency, honesty, virtue, non-corruption following the principle of good governance, non-conflict of interest following measure no. 100 and 300 of the Organic Act on Prevention and Suppression of Corruption B.E. 2542 and to purpose the performance following;

- 1) Transparency - the disclosure must be clear, rightful, reliable, and directly, especially for the process of procurement, including to the services and the encouragement of the transparency in every performance as required by the law.
- 2) Responsibility - to realize the liability, to have the clearness and readiness to confess in work process and management.
- 3) Non-corruption - to create the values of corruption-free for the organization in a policy. Not to discriminate for a personal benefit.
- 4) Moral culture in organization - to create a positive attitude, a corruption embarrassment, and a fear of corruption. The corruption is unacceptable in this organization.
- 5) Virtue in organization - the policy, the regulation, the manual and the performance are clearly defined to create the virtue in organization by the accuracy principle and the 9 core values. The executives and officers must adhere the virtue and molarity.
- 6) Communication in organization - the information must be accurate. The source of reference including to the communicative function in organization must be real because of it is a channel to impart the virtue and the transparency.
